**RTM Change** [ ]    **Start New Baseline** [ ]

**Problem:** The project has a requirement to provide web page access to the internet user community. Since the installation of the firewall this has become more difficult. The firewall stopped approximately 25 web servers from accessing the internet.

**Proposed Solution:** CM is preparing to upgrade ClearCase to version 3.1.1. Once this happens they will free up "krypton", a Sparc 1000 with 4 CPUs and 500megs of RAM. This machine is being offered to System Admin in support of the above requirement. However, they are in need of a machine to serve as the license/registry host. Randy Miller has offered up a SUN 20/712 from Goddard (testbed 5) for this use. Approval of this CCR will enable us to move the system from Goddard to the EDF.

*Need 1/16/98*

**Impact Analysis:**

Organizations Affected:

| | | | | | |
|---|---|---|---|---|---|
| | BOO [ ] | Contracts [ ] | ESO [ ] | FOS [ ] | M&O [X] |
